

IEEE PRISMTECH Problem Statements

Event Overview

Date: 26 September 2026. Duration: 24 hours. Venue: KLH Aziz Nagar Campus. Registration deadline: 21 September 2026.

Problem Domains

AI for Social Good, Cybersecurity, Healthcare Technology, Sustainable Cities, FinTech, IoT, Education Technology, Accessibility, and Open Innovation.

Statement Cards

Track	Description and expected outcome
AI Campus Copilot	Build an assistant for student services, events, academic support, and accessibility. Expected: working prototype and responsible AI notes.
Phishing Shield	Detect suspicious messages and train users through explainable risk signals. Expected: detection flow and dashboard.
Smart Energy Lab	Monitor and optimize electricity usage in campus laboratories. Expected: sensor model and savings insight.
Healthcare Track	Coming soon. Full requirements will be released during the opening ceremony.

General Requirements

Teams should describe the problem, target users, technical architecture, implementation plan, risks, evaluation method, and expected impact.

Expected Outcome

A credible prototype, public or private repository, demo link, short presentation, and clear explanation of feasibility and impact.
